### Summary

#### E-S Component

Jeff Krause, Dena Williams, and Angie Huebner collaborated on E-S STATUS prototype pages. They began by reviewing the existing RecSTATUS pages and determining what items would be appropriate and created spreadsheet identifying where the data could be found to populate the E-S STATUS pages. Ginny Dickerson created prototype page and will pull in raw data currently available so that additional review of the pages can be accomplished. Lori Brewster assisted with this effort.

Jackie Taylor reviewed, updated and made changes to the Watershed Management. This page needed extensive revisions.

#### Recreation Component

Sue Clevestine concentrated on the updating the Recreation Use Fee pages with assistance from Freddie Bell. Greg Webb worked on incorporating ORMS information into the NRMS and CATT pages. Doug Archer began development of an Operational Safety page that will cross business lines. These individuals compiled information and developed content and/or revisions. This information was then presented to the group for critique and further action by the SMEs.

Bonnie Bryson, John Marnell and Lori Brewster reviewed field comments received so far on RecSTATUS and drafted document outlining corrections/revisions to be made to the site by Ginny Dickerson. OMBIL raw data issues concerning RecSTATUS were also reviewed with Maggie Moses of IWR.
