Summary

Two workshops were conducted concurrently in Keystone, CO the same week that the RLAT and SAT met at that location. Lori Brewster worked with both workshops during the week, and provided the Park Ranger perspective for RecStatus. Further development of the RecStatus prototype was the primary objective of the first workshop. Kathy Carlson, Jonathan Davis and Susan Shampine worked with Bonnie Bryson and Ginny Dickerson to provide input from the Managers' perspective on the content within the RecStatus pages. This group also reviewed and updated the OPM pages on the Gateway. These pages now incorporate their comments and suggested revisions.

The purpose of the second workshop was additional development of the ES component of the Gateway. Angie Huebner facilitated as Jeff Brooks and Gary Swenson created the Forest and Woodland Management page and Don Morgan and Allison Ross created the GIS page. The groups were given time to compile information and write content. This information was provided to the Web Developer for test site development and then presented to the group to

critique and suggest improvements. After this, work continued on making additions to their pages.
