Subject: Survey of recreation and natural resource trends.

1. The Recreation Management Support Program (RMSP) is in the final stages of documenting important recreation and natural resources trends on Corps projects through a survey of all project NRM managers. The response to date has been excellent; however, there are a few projects that have been unable to access the survey via the Internet. Therefore, we are sending out hardcopies to these projects.
2. The survey appears lengthy on paper (it was originally designed as an Internet survey), but should take only 15-20 minutes to complete. I request that you complete it by hand with pen or pencil, place it in the enclosed return envelope, and drop in the mail. The return envelope has a pre-paid postage label that is pre-addressed to: Commander and Director, USA Engineer Waterways Experiment Station, ATTN: Richard L. Kasul, 3909 Halls Ferry Road, Vicksburg, MS 39180-6199.
3. This survey has been mailed to those projects for which we had no survey on file as of Jan 9. If you responded to the survey near or after that date, there is no need to respond again.
4. If possible, please return your responses by 26Jan01.
5. If you have any questions or comments, please contact me by phone at 601-634-3921 or by E-mail at kasulr@wes.army.mil.
6. Thank you very much.
