

Water Safety Hopscotch

Creating the Water Safety Hopscotch playing field is something that can be done either in a temporary or more permanent manner on any hard surface.

You can use either sidewalk chalk or spray/stencil paint to create the hopscotch playing field. If you use sidewalk chalk have children that are in the area help you make the playing field.

When someone is playing hopscotch they can shout out the sayings in the blocks as they move up the course. "Life Jacket: Get It On!; Learn To Swim Well; Reach, Throw, Row, Don't Go; Water Safety Rules!"

Water Safety Hopscotch design is below.
